Foreword

The South African Mountaineering Development and Training Programme (MDT), was established to develop and maintain nationally recognised standards for the many clubs, organisations and individuals active in mountain related activities.

The programme, controlled by the South African Mountaineering Development and Training Trust, a legally constituted body registered with the master of the Supreme Court, co-ordinates and administers the functioning of the national Mountain Training Scheme (MTS).

Introduced in 1996, the MTS comprises of eight partially independent schemes, each integrating practical, theoretical and experiential components through a process of training and assessment. From the Basic Mountain Walking Leader Scheme to the Mountaineering Instructor Scheme, each is primarily concerned with good practice, leading to the safe enjoyment of the activity.

Training and assessment courses are run by individuals approved and accredited by the trust.

Since its introduction, the programme has gained the support of the many professional, semi-professional and voluntary guides, leaders and instructors active in South Africa's mountains.

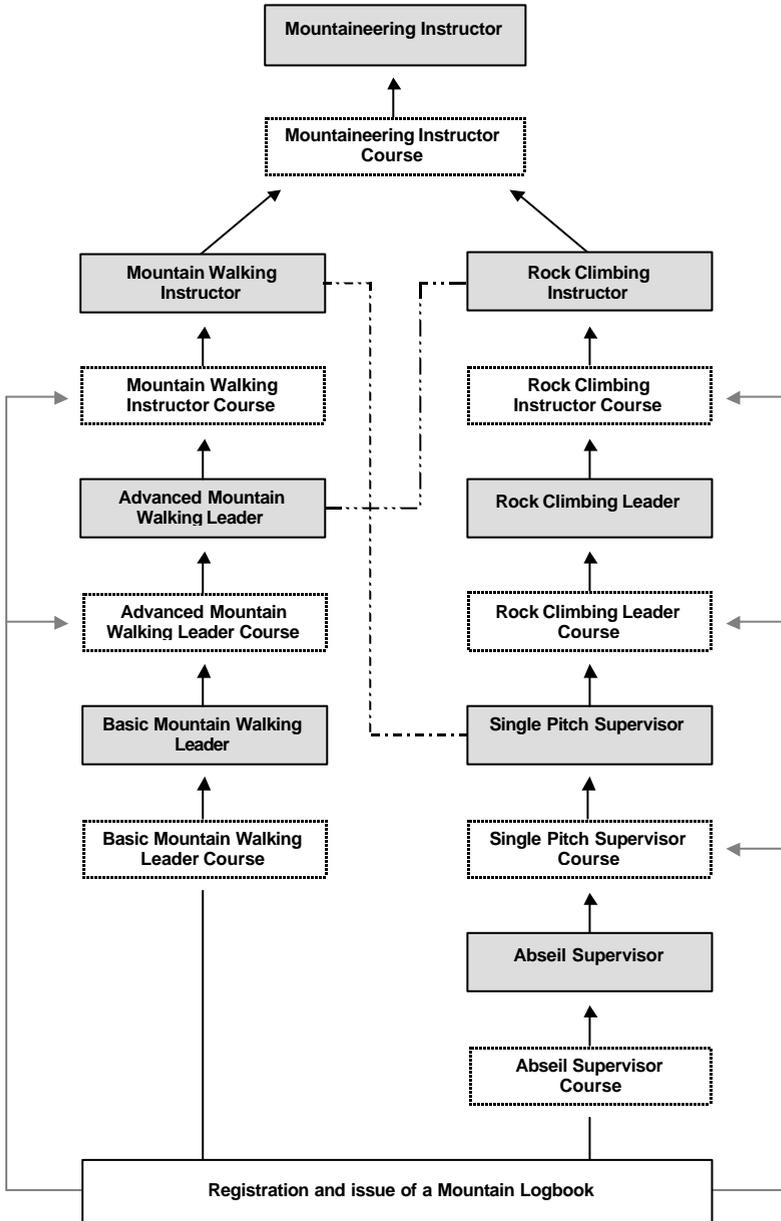

An overview of the Mountain Training Scheme is provided on the next page.

Information on the components of the MDT programme, how to register, or where to go for training and assessment courses can be obtained from:

The Mountain Training Scheme

Single Pitch Supervisor Scheme Prospectus

Introduction

The Single Pitch Supervisor Scheme (SPS) provides training and assessment for those who supervise single pitch rock climbing. It is suitable for individuals working in a professional, semi-professional or voluntary capacity.

Scope

The scheme has been designed for those who are in a position of responsibility. It is primarily concerned with good practice leading to the safe enjoyment of the activity.

The scheme does not cover:

- the skills needed to approach and retreat from mountain crags;
- multi-pitch rock climbing and its supervision;
- access to any location where escape is not easily possible from the top and the bottom of a climb.

Completion of a training course alone, without taking an assessment course, is not a qualification in itself, although it may be of considerable benefit to the trainee.

Stages

The scheme comprises of:

1. registration and the issue of a log book;
2. a two day training course;
3. further experience gained during a consolidation period;
4. a two day assessment course;
5. continuing experience entered in a logbook.

Registration

The candidate wishing to register must:

- be not less than eighteen years of age;
- have at least twelve months experience of rock climbing;
- have a genuine interest in rock climbing and the supervision of groups on single pitch crags;
- complete the registration application and enclose the appropriate fee. This should be submitted to the MDT via an approved course provider.

Course Providers are given a period of 14 days from the date of completion of the course, to submit the registration details of their course attendees. The MDT administration then has a further 14 days to process these registrations, and to supply you with your registration number as recorded on the MDT database

Please feel free to contact the MDT administration at any time to check up on your registration. You should receive an e-mail/sms/phone call confirming receipt of your registration form once the MDT administration has received it. If you do not receive such confirmation, you may contact the MDT administration, who will contact the service provider immediately should the registration details not yet have been submitted.

The purpose of this is to ensure speedy registration, leading to satisfied MDT members. Please be assured of our commitment to aid you in this process.

Training

The candidate must attend a two-day training course run by an approved course provider².

The training course is for potential supervisors and assumes basic competence as a rock climber. It will emphasise those skills, which a candidate might have difficulty in learning without expert guidance.

On completion of training, the Director of Training will endorse the appropriate page(s) in the logbook.

Logbook

Experience gained by the candidate should be recorded in the MDT SPS Logbook. Entries should be concise and easily read, and should include all rock climbing and other relevant experience.

The logbook is divided into five sections and includes:

- a record of experience gained prior to the training course;
 - the particulars of the training course completed by the Director of Training;
 - a record of experience gained during the period between the training and assessment courses;
 - particulars of the assessment course completed and issued by the Director of Assessment;
 - a record of experience gained after assessment.
-

Consolidation

During the period between training and assessment courses, the candidate is expected to gain extensive climbing experience at a wide range of venues and some practice in assisting the supervision of groups under the direction of a suitably qualified person³.

The consolidation period will be a minimum of six months.

First Aid

At the beginning of the assessment course the candidate must hold a currently valid and approved first aid certificate.

Assessment

Before attending an assessment course the candidate must:

- have registered;
- have attended a training course;

- have gained further supervising experience;
- be able to lead climbs graded fourteen;
- be familiar with all aspects of the syllabus;
- hold a valid approved first aid certificate.

During the assessment course, which lasts two days, the candidate will be tested in accordance with the syllabus requirements.

The Director of Assessment will endorse the logbook in one of three ways:

Pass

Awarded where the candidate has demonstrated proper knowledge and application of the course syllabus and has shown the necessary experience for the application of single pitch supervision.

Deferred

Awarded where the candidate has generally performed at the required standard and shown the necessary experience and attributes, but where complete proficiency has not been attained. Written recommendations for further experience will be given, along with details of the proposed one-day reassessment.

Recommended reassessment

Awarded where the candidate's performance had been weak, or the necessary experience and attributes have not been shown.

Reassessment

The candidate cannot be reassessed for more than one day of the two-day assessment course. This must follow a minimum period of three months. The candidate may only take two reassessments before being required to take the entire course again. Since the reassessment will be based on information gained during the assessment all reassessments must be completed within a five-year period.

Exemption

The candidate who has substantial climbing and supervising experience on single pitch crags and climbing walls may apply for an exemption from stages two and three.

A candidate, wishing to apply for exemption, must be able to demonstrate exceptional previous experience.

Applications for exemption must be made in writing to the secretary of the Assessment Panel.

Single Pitch

For the purpose of this scheme a single pitch climb in one which:

- is climbed without intermediate stances;
- is described as single pitch in a guide book;
- allows students to be lowered to the ground at all times;
- is non-serious and has little objective danger;
- presents no difficulties of approach or retreat, such as route finding or scrambling.

Single Pitch Supervisor Scheme

Notes

1. The MDT Administrator, on receiving the registration application and registration fee, will issue a receipt as proof that registration has been successful.
 2. A list of approved course providers is available from the MDT.
 3. Ideally, the candidate should be under the direction of a Single Pitch Supervisor, or higher award holder.
-

Scope

It is the duty of the employer or organising authority to decide whether a supervisor possesses the personal attributes needed to take responsibility for the care of young people and beginners. It is the combination of technical skill, wide experience and personal qualities that form the basis for effective supervision. The scheme assesses the technical skills and experience; the employer or organising authority has to gauge the personal qualities.

Experience

Candidates often experience some difficulty when compiling their registration forms and logbooks, in trying to determine whether or not they meet the experience requirements of the Scheme.

The Director of Assessment and Assessment Panel are looking for both depth and breadth of experience since the candidate who only has the minimum experience is unlikely to benefit from either training or assessment.

The Mountain Training Scheme is South Africa oriented, therefore the experience recorded should reflect this. Whilst experience gained abroad is undoubtedly valuable it is not necessarily the most appropriate.
